

Dipl.-Wirt.-Ing. (FH)

RSW, PhD candidate at the Faculty Mechanical Engineering of the Technical University of Košice in Slovak Republic and engineer candidate in Mechanical Engineering of the Technical University of Dresden in Germany.

RSW is a 2006 graduate of the Cologne University of Applied Sciences in Germany, where he earned a engineer´s degree in Mechanical Engineering with Business.

RSW is in a management position at one of the world´s diversified technological and manufacturing leader in automotive safety which produce a large array of active and passive safety technologies and chassis systems. RSW has some years of proven cross-cultural experience in the automotive industry. Additionally, he is top performer with a strong background of OE automotive components (braking, steering, suspension and fasteners) for passanger cars and heavy commercial vehicles as well as the more and more important sector remanufacturing.

RSW came to this company from an US multi-industry company which is the world´s largest products and services provider in the business segments aircraft, automotive, industry and finance, where he was in sales. He was subsequently in an occupation as Resident Launch Engineer by a major VM where he earned vehicle launch experiences.
